PROFESSIONAL SUMMARY

AI Engineer who ships production RAG pipelines, conversational AI, and semantic search into real enterprise products. Specialist in Arabic NLP and scalable FastAPI microservice architectures.

PROFESSIONAL EXPERIENCE

AI Engineer — Frontier Tech

Nov 2025 – Present

Qamishli, Syria (On-site)

- **Led end-to-end integration of three AI features for Aqarat, a production real-estate platform** — an intelligent support chatbot, an automated property-description generator, and a semantic search engine.
- **Built an Arabic-dialect semantic search engine** with FAISS and sentence-transformers, letting users find listings through informal, conversational queries via vector similarity search.
- **Architected the chatbot and description generator on the Gemini API using RAG** — with prompt engineering, intent detection, and multi-model fallback for reliable, JSON-structured outputs.
- **Designed and deployed scalable AI microservices on Linux** (FastAPI, Uvicorn, Pydantic), integrating with Laravel backends (Queues/Jobs) and React frontends.
- **Deployed local LLMs (Ollama, Gemma) with strict guardrails** over enterprise knowledge bases — eliminating hallucinations and keeping sensitive data on-premise.

AI & INNOVATION PROJECTS

Project Arcu — Structural Engineering AI

2026

- AI desktop/web app that automates quantity takeoff for civil and structural engineers — parsing AutoCAD DXF/DWG files to autonomously generate precise Bills of Materials for footings, columns, and beams.

Intelligence-Radar — AI / RAG System

2026

- AI data-extraction and retrieval system combining local LLMs with search APIs to automate data-gathering and processing workflows.

Arabic Speaker Separation System — Graduation Project

2024 – 2025

- Fine-tuned pretrained models on Arabic voice datasets to separate overlapping speech; customized architectures for the acoustic characteristics of Arabic, grounded in academic research.

DATA ANALYSIS

- Time-series analysis of a large-scale Washington bike-trips dataset and student-engagement behavioral analysis (Yasmine AI internship), using Pandas, Matplotlib, and feature engineering for predictive modeling.

EDUCATION & TRAINING

B.Sc. Information Technology Engineering (ITE) — Damascus University

2025

Machine Learning Training — SHAI

2024

TECHNICAL SKILLS

AI & Machine Learning: RAG Systems, Local LLMs (Ollama, Qwen, Gemma), Semantic Search (FAISS, sentence-transformers), Intent Detection, Prompt Engineering, Arabic NLP

Backend & Architecture: Python (FastAPI), PHP (Laravel REST APIs), System Design, Microservices, Linux Deployment, JSON Structured Output, Multi-model Fallback

Data: Pandas, NumPy, Matplotlib, Seaborn, Excel / Power BI

Languages: Arabic (Native), Kurdish (Native), English (B2 / Upper-Intermediate)
